EXPERIENCE

Supply Chain Procurement Intern

June 2024 – Present

Northstar Photonics

San Jose, CA

- Managed daily issuance of PRs and POs while maintaining GDM and GMP standards, including requesting and verifying CofC and CofA as needed and **communicating with 5+ suppliers** on our AVL for a new project.
- Worked closely with engineering, manufacturing, and QA teams to align supply chain activities with production schedules, contributing to on-time project delivery.

Founder

December 2019 – Present

Angelo's Automotive Detailing

San Jose, CA

- Founded an automotive detailing business, prioritizing quality work and customer experience, **providing services to 70+ customers**. Formulated business vision, goals, and objectives to foster unforgettable experiences.
- Adapted business model through the use of customer feedback, analyzing and restructuring to improve processes, **leading to a profit of \$10,000 within the first 3 months**.

Salesforce Lab Assistant

May 2024 – Present

San Jose State University Department of MIS

San Jose, CA

- Guide business students in comprehending the process of developing enterprise databases and mobile/web applications through the Salesforce platform.
- Assisted 200+ students** in completing lab manuals by using Salesforce technology to build web-based database applications with object relationships.

Assistant General Manager

May 2023 – May 2024

Teaspoon

San Jose, CA

- Coached a struggling barista, recognized the leadership potential, and took a hands-on approach to prioritize improvement, resulting in the individuals **receiving 2 promotions** and winning most improved within Q1 2024.
- Gained valuable insights into leadership, **emphasizing the importance of active listening**, fostering team dynamics, building trust and relationships to create a strong and productive team.

PROJECTS

Optimization of Event and Project Management Systems | Project Management Institute

June 2024 – Present

- Built relationships with key PMI stakeholders, conducted interviews to identify user pain points and gather requirements, and executed system enhancements to **reduce manual inputs by 50%**
- Developed OKRs and KPIs to track success, created comprehensive documentation including workflow diagrams and empathy maps, led the creation of a project charter, and facilitated weekly role rotations to promote teamwork, with each team member taking turns leading and fulfilling different roles.

MISconnect | Personal Project

March 2024 – Present

- Recognizing a critical need from personal experience, I am creating an online platform to connect SJSU's MIS student community. Targeting a fall 2024 launch, the goal is to **achieve 500 active members** initially and ideally over 1,000, fostering networking, knowledge sharing, and community building.

Live Analytics Dashboard | Fundamentals of MIS

Jan 2024 – May 2024

- Performed sales data analysis on 10,000 records using Google Collab and Python, **driving margin growth from 1% to 38%** for a product category and **10% annual profit increase**. As part of a team of 3, leveraged analysis insights to collaborate cross-functionally and develop a live analytics dashboard for key stakeholders.
